CREATION OF EC2 INSTANCE:

- 1.Go to the AWS Website
- 2.search "Ec2" and click on it
- 3.Now click on "CREATE EC2" instance
- 4.Give the details like name , and type(ram and hdd) and select a security for it
- and also select the server (windows,linux etc....)
- 5.Finally create the instance

IAM LAB:

1. In the AWS Management Console, on the Services menu, select IAM.
- 2.
3. In the navigation pane on the left, choose Users.
4. The following IAM Users have been created for you:
 - user-1
 - user-2
 - user-3
 -
5. Choose user-1.
6. This will bring to a summary page for user-1. The Permissions tab will be displayed.
- 7.
8. Notice that user-1 does not have any permissions.
- 9.
10. Choose the Groups tab.
11. user-1 also is not a member of any groups.
- 12.
13. Choose the Security credentials tab.
14. user-1 is assigned a Console password
- 15.
16. In the navigation pane on the left, choose User groups.
17. The following groups have already been created for you:
 - EC2-Admin
 - EC2-Support
 - S3-Support
 -
18. Choose the EC2-Support group.
19. This will bring you to the summary page for the EC2-Support group.

CREATION OF EC2 INSTANCE:

- 1.Go to the AWS Website
- 2.search "Ec2" and click on it
- 3.Now click on "CREATE EC2" instance
- 4.Give the details like name , and type(ram and hdd) and select a security for it
- and also select the server (windows,linux etc....)
- 5.Finally create the instance
